Your Brain on Drugs: How Addiction Changes Your Brain

What makes your brain seek out drugs? Is there any way to change its function and stop addiction? Dr. Calipari utilizes cutting edge research techniques to change the activity of neurons in the brain and promote, or stop, drug-seeking behavior. Come and find out how it works, everyone is invited!

Presented by:

Erin Calipari, Ph.D.

Department of Pharmacology

Vanderbilt Brain Institute, Nashville, TN

When and where:

Wednesday, February 20th, 3:00 pm

Coulter Hall (Room 211, next to Starbucks)

University of Mississippi – Oxford campus
